All information and all technical specifications are correct at time of going to press. Bianchi reserves the right to change them without prior warning. For further information, please see our web site www.bianchi.com that is always updated. Bianchi recommends all cyclist wear a helmet and abide by the high way code.

BIKE TRACE

TO OWN A BIANCHI BIKE MEANS TO BELONG TO A BIG FAMILY. WITH THE BIKE TRACE PROJECT, FANS AND OWNERS CAN COUNT ON AN EXCLUSIVE TOOL WHICH ENSURES, AT ANY TIME, THE FULL TRACEABILITY AND IDENTIFICATION OF ANY BIANCHI RC (REPARTO CORSE) BICYCLE.

You just need to log on the www.bianchi.com website, click on the Bike Owners section and register your bicycle by filling in the Trace Form with your personal data and those of the frame.

The recording of this data will make it possible to trace back the history of any bike by monitoring the history of the text and also its 'sporting life'. The Quality Control Report coupon, which can be found in each packaging and includes all the necessary information for the product registration, is fundamental. In the event of loss of the coupon, it is however possible to find the necessary data directly on the frame itself. The frame code is marked on the bottom bracket of all the models, except for the carbon ones. For these last ones the frame code is on the internal parts of the left rear vertical drop out. This service guarantees the total traceability of the bicycle providing a precious support in case of theft and loss.

THANKS TO BIKE TRACE YOUR BIANCHI IS YOURS EVEN MORE.

history

Celeste. A passion.

There is only one colour that has marked the history of cycling. The 'Celeste' colour of Bianchi has appeared on the **JERSEYS AND BIKES OF LEGENDARY CHAMPIONS** such as Costante Girardengo, Tano Belloni and Fausto Coppi, striving heroes like Felice Gimondi or climbing artists like Marco Pantani.

Several World Champions, like Gianni Bugno, Moreno Argentin and Julien Absalon and many other successful athletes rode Bianchi bikes to victory in the races around the world. These legends contributed to the **MEMORABLE HISTORY OF CYCLING**, and they will keep on making history thanks to the MTB and road teams that Bianchi supports. A history written in clear, "Celeste" letters.

Bianchi's cycling philosophy

No twenty-year-old racer could win a Tour De France, unless he is a real champion. This is a lesson Felice Gimondi taught us all during his long career, when **HE AND HIS BIANCHI LEFT BEHIND ALL THE OTHER CHAMPIONS OF THE TIME**. Including the legendary Eddy Merckx, during an unforgettable World Championship, when the racer from Bergamo managed to beat the "Cannibal", the all time winner, thanks to both his muscles and strategy. Three Giro d'Italia, one Tour de France, Paris-Roubaix and Paris-Brussels, sit beside uncountable other victories gained in one-day races and stage races. These are the numbers of a rider who was able to express, at his best, the idea of a **STRONG, BOLD, INDOMITABLE SPORT LIKE CYCLING. THIS IS BIANCHI.**

Factory

2

The soul? It's serial

In Bianchi there's something special in the air. It's the wind coming from the road and from a passion that never faded throughout 120 years. For more than a century, Bianchi has committed to finding **NEW SOLUTIONS** and building frames more and more rigid and light-weight, to design each bike around the cyclist, always using the latest technologies. Besides that, there's another component, the most valuable and priceless amongst all, that no technical innovation could ever replace: **THE SOUL**. An essence that's all or nothing, made up of thousands of ancient gestures, of incessant searches for the best design, components and materials.

people

Perfection in bits

Nothing in Bianchi is ever left to chance. Each frame is just like a person, a **UNIQUE PRODUCT** that shall be studied and analyzed, first through computer technology and drawings and then on the road. Each component is numbered and recorded, to track them in the production process. But this is not just a mechanical process. The workers follow the production of each single frame personally, paying attention and care to a **PRODUCT HANDMADE BY THEMSELVES**. That's why every Bianchi bike is different from all others: because cyclists differ from one another, and each of them, either a champion or an amateur, can always count on advanced, high quality and always reliable models. A Bianchi bicycle.

Bianchi
Individual

4

A question of fibres

There are fibres in human muscles, and there are, as well, **COMPOSITE FIBRES**. Both can be shaped through training or research, to make the athlete and his bike, the man and the machine, a winning pair. The biomechanical laws and the application of revolutionary nanotechnologies combine together in a fusion of tradition and science allowing the search for perfection and its achievement. This perfection is now **MADE TO MEASURE** for each cyclist and fits perfectly just like a tailored suit, thanks to the **BIANCHI INDIVIDUAL CUSTOM FRAME** and bicycle program. No longer just a bike, but now **YOUR OWN BIKE**. You can choose your frame, model, materials, dimensions, colour, even finishing kits and components, and in some cases also wheels. And finally ride the bike you have always dreamt of.

Individual

The perfect match

It is easy to find your perfect combination among over 100,000 different possibilities. The first and most important step is your **BODY MEASUREMENT**. Bianchi technicians can ensure your perfect position in the saddle, to avoid any problems resulting from a wrong position in the saddle. The handlebar stem length, the correct size handlebars and the crank lengths all result from your body measurements. The most suitable frame stiffness can also be defined. And there is room for aesthetic as well, because you can choose the colours that you would most like on the frames in **TITANIUM, CARBON, ALUMINIUM AND STEEL MATERIALS**.

And on top of everything you will receive a certificate of authenticity and originality and a distinctive kit, because you will find no other one around, it is unique, it is yours. The unique bicycle with an identity document.

	XTREME	MULTIPURPOSE	COMFORT	STREET	WOMEN'S	SPECIAL	
<i>road</i>	HC HORS CATEGORY	4 BORN FOR PERFORMANCE	C2C COAST TO COAST		DAMA  BIANCA	D 2	page 8
	Exactly as there are different riders, there are also different ways to achieve your goals in cycling. And the Bianchi Road Range is ready to meet all your needs, with the attention and care, that is its distinctive feature ever since Edoardo Bianchi opened his doors many years ago.						
<i>mtb</i>	RACING	PERFORMANCE	LEISURE				page 42
	The other road of Bianchi. Both the dirtiest and newest, but already rich in international success. Olympic and World Championships, to mark a technological supremacy which doesn't change when the terrain does. The best on offer for all sectors, from cross country to marathon riding.						
<i>sport</i>		CAMALEONTE					page 62
	If cleverness is the art of adaptation, then the bicycles of the Camaleonte range are clever. Like the animal bearing their name, they find their natural habitat in the city, but also on the week-end roads. For those who believe that two-wheels without an engine are a philosophy of life.						
<i>city</i>			T-ROAD	S-ROAD		CROSS TERRAIN	page 68
	The most ecological means to move throughout the city, without polluting the environment, without using up fuel. A lifestyle, an idea of individual mobility which Bianchi has been capable to realize, with a range conceived for commuting into the city and for leisure. With all Bianchi comfort and technology, dedicated to the urban rider.						

Bianchi

OSIRANGE

ROAD HOC

HORS CATEGORY

The name is very promising. **HOC** is in fact the acronym of **HORS CATEGORY**, which means a race, or a bicycle, that is one of a kind or beyond category. Like all Bianchi models, it features a geometry conceived from the extreme research of the lightness-performances ratio. It is ideal for the most evolved and demanding of rider.

 **CARBON** *superleggera*

1949, 1952, 1998. These are the years in which Bianchi won both the Giro and the Tour. The last digits, together, compose the name of a range of unique bicycles. The 928 Carbon SL frame is stiff, reactive and light, it weighs only **900 g** and is made of unidirectional carbon fibre, with the most advanced production processes, including **nanotechnology**. The new **Full Carbon fork, also in unidirectional carbon**, features an internal structural reinforcement (TSR) which increases its lateral stiffness, weighing only 315 g.

The initials of a great champion; **Felice Gimondi** and the adjective "lite", defining the main feature of this model. Made in triple-butted hyperalloy aluminium, it has ultrathin and ultralight tubing. The bottom bracket shell is reinforced by the **Structural Foam Injection**, a Bianchi patent.

ROAD B4P

BORN FOR PERFORMANCE. These bikes are very rigid yet light, they feature a racing geometry and are available with either carbon, titanium or aluminium frames - A **VERSATILITY** which reflects the personality of those who choose them.

MATTA

The flagship of the range is named after the car which always followed the **Campionissimo Fausto Coppi** in his victories: The Bianchi S9 "Matte". This model is abreast of Bianchi history: the frame is in ultra-light titanium alloy and the tubing is double-butted for excellent rigidity and **vibration dampening**.

CARBON T-CUBE TECH

A bicycle capable of punching way above its class. The frame weighs about 1 kg and features Bianchi's "**Tube to Tube**" technology, the finish is in 1,5 k carbon, while the fork is the new **full carbon with semi 'straight' blades** and the new Bianchi Design rear drop outs are in aluminium.

CARBON MONO Q TECH

Rigidity is its strong point, thanks to the new monocoque 12k carbon frame. The fork is full carbon with semi-straight blades. The production process maximizing the **price-performance ratio**.

1885 **UNCOTTICOTTICINQUE-ALU**

The year that "**Edoardo Bianchi**" created his workshop and a legacy, is the name given to a model reflecting the spirit of its origins but up-to-date through advanced technology. The new frame is **completely** made from triple butted **aluminium alloy** with smooth TIG welding, the **Super Plastic Forming** matching the creative design with an exceptional rigidity.

ROAD C2C

COAST TO COAST

COAST TO COAST, like the fabulous crossings of a continent from coast to coast. A name recalling the **PASSION FOR LONG DISTANCES**, to be covered in the **UTMOST COMFORT**. Guaranteed by BAT active technology, granting a balance between torsional rigidity, affecting the frame during pedalling, and the **VERTICAL VIBRATION DAMPENING** of the rear stays. **FOR RIDERS WHO LOVE KILOMETRES.**

CARBON C2C

BAT active technology, with a higher head tube, longer rear stays and wheelbase, to achieve **rideability and stability**, and a great reactivity to sudden changes of direction. **The best in ergonomics and comfort** and of vibration dampening, thanks to 1k kevlar inserts on the frame and front fork.

VIANIRONE7ALUHYDROCARBON

The address of "Edoardo Bianchi's" first workshop in Milan. This is a resistant and rigid frame in triple butted 7000 series aluminium featuring hydroformed sections. The rear stays are in carbon with 1k kevlar antivibration inserts, as on the **Alu Carbon** fork.

VIANIRONE7ALUHYDRO

In triple butted 7000 series **aluminium** throughout with **hydroformed** sections to ensure the best ratio between design and functionality. The Alu Carbon fork with 1k kevlar inserts which dampen vibrations, thus improving comfort and reducing fatigue.

ROAD DAMA BIANCA

The elegant lady at the side of the Campionissimo is part of cycling history. But the Dama Bianca range is made for women who are protagonists and who live sport. Bicycles designed for **FEMININE CYCLING**.

Lei CARBONT CUBETECH

Geometry is specifically designed around a woman's morphology, as well as specific components. New finish is in 1.5k carbon with new rear dropouts specifically designed in aluminium. The **full carbon** fork are ultra-rigid and lightweight with semi-straight blades.

She ALUHYDRO

The frame is in triple butted 7000 series aluminium, with dedicated profiles. The fork in Alu/3k Carbon, with inserts in 1k Kevlar to dampen vibrations. New rear stays in carbon, with 1k Kevlar finish.

ROAD D2

PISTA STEEL

Simply the best on all roads, whether tarmac, dirt or track. The leading models feature the acronym D2, the name of the first Bianchi model to win a competition, and all the Special bikes have select frames, special products for the specialists of cycle racing. From the triathlon marathons to the mud of cycle-cross, up to the breathtaking thrills of the track. **FOR TRUE MEN, WOMEN AND RIDERS.**

Speed and efficiency, in their natural habitat, is in the Velodrome. The frame has been made using chrome-molybdenum tubing, which offers rigidity and stability. And the design is Bianchi, an unmistakable combination.

CRONO TRIATHLON CARBON

Carbon monocoque frame with nanotechnology weighing only 1,35 kg, the seat tube has an angle of 76°, integrated seat post with multi-position clamp. It is the identikit of a super rigid model, lightweight and aerodynamic, performing in all its details. From the Super Aero full carbon fork weighing 450 g to the oversized and perforated chain stays, up to the horizontal rear drop outs which permit the rear wheel to get closer to the seat tube, thus reducing the turbulence between wheel and frame.

CRONO TRIATHLON ALU

For fighting, and winning, against the clock, in the saddle of an aerodynamic model with the frame made fully in aluminium alloy, welded using the tube-to-tube technique, featuring **triathlon specific geometry**. Using both double and triple butted tubing for excellent rigidity.

CROSS CONCEPT RACE CARBON

Specifically designed for **cycle-cross**, it matches lightness and resistance in a perfect mix which is granted by Bianchi technology. The monocoque frame is in carbon, developed for competitions, and the top tube features a specially designed section to help when carrying the bike during the most demanding stretches.

CICLOCROSS AXIS ALU

A 7005 series aluminium frame with butted tubing and specific tube profiles – conceived to control vibrations and tame rough ground, while never losing stability.

mtb RACING

Competition, without compromises, where victory is the goal and the bicycle is the tool. Made in either aluminium, carbon or titanium, these bikes are rigid and ultralight and the XC reactive geometry, tested on competition, ensures the utmost stability. Made for those who **COMPETE TO WIN.**

OETZI 9800 TITANIUM

Oetzi, the Similaun man, the ancient man of the mountains, gives his name to a range of models which are ideal for **extreme climbs and descents**. And they do it without fuss, thanks to special XC geometry, an **ultralight titanium alloy frame**, and CNC-machined rear drop outs, that provide excellent absorption of vibrations and precise handling.

OETZI 9800 ALU

A very lightweight, **triple butted hyperalloy frame**, with a bottom bracket shell which is even lighter than before thanks to CNC-machining, though more resistant thanks to the Structural Foam Injection technology which strengthens the area. Designed to reach the top of the mountain as well as its category, without unnecessary load.

OETZI CARBON

The geometry has been conceived together with the champions of the **Gewiss-Bianchi team**, and it clearly shows. But you also feel it when you face the most demanding courses and the bike is always stable and quick to respond. All of this is thanks to the **monocoque carbon frame**, fine-tuned by nanotechnology, with a negligible weight of only 1.2 kg. Designed to ride, ahead of the competition.

CAMOS CARBON

A bike whose name translates to 'chamois', the mountain goat, is a bike conceived for **riding up in the mountains**. This has also been asserted by Thomas Dietsch, the champion who tested and helped to improve it. The weight/rigidity ratio of the frame is now ideal, thanks to the high pressure moulding technique at differentiated areas. And the bike's reactivity, with XC geometry, is worth of this name.

RACING

mtb PERFORMANCE

When performance really counts. Your bike must be reliable and take you to the very end. With a legendary reliability and, thanks to its XC geometry endowing it with unique manoeuvrability. **FOR THOSE WHO COMPETE IN LONG DISTANCE RACING BUT ALSO FOR THE MOST DEMANDING DAY OUT.**

MUTT ALU

"Mutt" translates to mountains. The ideal ground for a **long-distance race model**, with a triple butted 7005 series aluminium frame, created using **Super Plastic Forming** technology, which ensures innovative design and the utmost in rigidity. It is time to try!

CAAL Marathon ALU

The "horse" designed **to ride uphill** as well as down. And it squashes single tracks, holes and crests, with its mono-pivot long travel (120 mm) rear suspension. A light and functional system, enriched by the red anodized system of linkages makes this model distinctive by both looks and design.

PERFORMANCE

mtb LEISURE

Those people who pedal in their leisure time also deserve the latest technology. A technology offered by the models of the Leisure range, as well as a geometry especially conceived to get a **MORE COMFORTABLE** position in the saddle, less extreme and more relaxed. Bicycles **FOR THOSE WHO ARE APPROACHING THE MTB WORLD AND WANT TO DO IT IN THE RIGHT WAY.**

DOSS ALU

A simple brow of a hill and it's already a mountain bike. A 6000 series **triple butted aluminium frame** with a geometry designed to feel at ease immediately in the saddle. A bicycle to prove that off-road can be **comfortable** if there's a Bianchi with you.

RUCK ALU

A "ruck" is an estate on the top of a hill. One of the many destinations achievable with this model, featuring a 6061 series **triple butted aluminium frame**. For those who love to pedal without the obsession of competition, only chasing a pace, your own pace.

TURMAC

The frame features an aggressive look, thanks to its super sloping design in 7005 series **aluminium with square section tubes**, offering the right mix between design and functionality.

CONAN

The 6061 series aluminium Conan frame, with its **shock-absorbing system**, mono-pivot design, offers a valid alternative for those who are looking for comfort.

FRAMES

SPORT CAMALEONTE

If cleverness is the art of adaptation, then the bicycles of the Camaleonte range are clever. Like the animal bearing their name, they find their natural habitat in the city, but also on the week-end roads.

FOR THOSE WHO BELIEVE THAT TWO-WHEELS WITHOUT AN ENGINE ARE A PHILOSOPHY OF LIFE.

camaleonte 6 CARBON

The Sporty look, it features a frame using **carbon fibre** like the leading models of the Reparto Corse range, weighing only 1.20 kg. The rear drop outs designed for a disc brake, as well as the front carbon fork with straight blades

camaleonte 5/4 ALU CARBON

The frame made in 7000 series **aluminium**, with triple butted tubing. TIG-welding with a special anti-corrosion treatment increases resistance and ensures a long life. The rear stays and the front fork are in carbon to reduce weight and increase comfort.

camaleonte 3 ALU/2 DISC ALU

Made throughout in **aluminium**, it features the exclusive Bianchi design, thanks to **Hydroforming**, a technique which allows us to obtain ultra-light sections, while maintaining a high rigidity. The main triangle features a marked "slope" to make the frame compact and reactive, and the rear stays are longer for more comfort. You can expect only the best from a Bianchi.

AERON

Thanks to its geometry and the triple-butted 7005 series aluminium, it offers the possibility to travel quickly with the utmost comfort.

CITY T-ROAD

Practicalness matching elegance. These are the main features of the T-Road models, with dedicated frames characterized by **CLASSIC AND SPORTS SHAPES**. But if you use a T-Road you will appreciate above all the reliability even on a long run.

VIA DELLE BATTAGLIE

This is where Bianchi's seat is located, in Treviglio, and this is also the name of a nimble and practical bike in triple butted 7000 series **aluminium**, reinforced by **Hydroforming** at the junction points. For daily use, during every season, is shown by details like large wheels, adjustable stem and accessories such as a carrier and mudguards.

VIALE ABRUZZI

Geometry for the frame and the name which recalls the first, historical Bianchi seat in Milan. Tradition and innovation, in a comfortable and versatile fully equipped bicycle, suitable for moving around in the city.

CIT CROSS TERRAIN

Beach bikes land in the city. **ATTRACTIVE AND APPEALING**, they are irreplaceable during your free time and comfortable in the city, with their easy manoeuvrability and a saddle position which is comfortable for the upper body. Large wheels aid stability, because even cobblestones can catch you out. **FOR RIDERS WHO LIKE TO BE TRENDY. AND WHO LIKE TO CREATE TRENDS.**

MODELS

The capital of Italian fashion and creativity gives its name to the models of the range: **Milano Città, Milano and Milano Parco**, all of them with aluminium frames. Geometries have been designed to offer the utmost in terms of rideability and safety, whereas the large wheels ensure stability even in the most uneven roads. The dedicated handlebar is equipped with the practical and intuitive shifters located near the grips. The **Milano** model uses the traditional Shimano transmission, perfect for the purists of the bicycle.

CROSS TERRAIN

CITY S-ROAD

All that you need to move in the city. Nimbleness, comfort and safety, with different geometries for both male and females, triple chainsets for easy pedalling and fully equipped with practical carriers and stands. **FOR THOSE WHO RIDE EVERY DAY, AND WANT TO RIDE WITH STYLE.**

MODELS

In the **Spillo range**, we have the **Brillante, Diamante, Topazio and Rubino** versions which are not just a city bike, they are **“the” city bike**, a concept created by Bianchi in 1990. The idea is simple and brilliant: to put at an urban rider's disposal all the technology involved in the sport, with a 7000 series aluminium frame and with the infinite possibilities to change speed. And this is not all, the bike is fully equipped for daily use: a large carrier, protecting mudguards and lights for riding the bicycle at night in total safety.

VIAGGIO

JUNIOR ROAD/MTB/BMX/CITY

A little rider has to enjoy a great bike. A tool conceived especially for them, capable of transmitting the right sensations, since the very start. Growing, kilometre after kilometre, together with the bicycle. **THE BIANCHI JUNIOR RANGE WILL ACCOMPANY THEM FROM THE AGE OF 3 ONWARDS, BOTH ON AND OFF-ROAD.**

ROAD JUNIOR

Junior in name, but not in technological solutions. A **champion's bicycle** small in scale, with an aluminium frame and all Bianchi technology, for the first experiences on road. Because little riders are not that little.

OETZI JUNIOR

If you start riding off-road, it is better to start with the right size components. For example the Oetzi Junior cranks are **custom-made for young champions**. Like the rest, from the frame geometry to the other components. To feel and become like an adult.

TURMAC

A super sloping frame in 7005 series **aluminium** with square section tubes, because little riders are not that little. And they can appreciate immediately Bianchi's **design and functionality**.

CONAN

Comfort also for small riders, thanks to the 6061 series **aluminium** frame, with its mono-pivot **shock-absorbed system**.

BIKERZ

A complete range for children who want to start riding quickly. And they can do it in the best way, and with the greatest fun, thanks, also, to the special **aluminium** frames and to the dedicated components. Total safety, because these bicycles are produced in compliance with strict regulations.

BMX

Small, compact, ready to sprint, **acrobatic tricks**. It is the BMX, introduced in Italy by Bianchi in 1982 and now present at the Olympic Games from 2008. An **indestructible frame**, manoeuvrable and a lot of fun in its DNA. For a game which has just only started.
